Environmental Policy & Procedures

DT Compressor Services Ltd

Document reference	DTCS-POL-ENV-001
Issue / version	1.1
Issue date	14/10/2026
Author	Ross Turville
Document owner	General Manager
Approved by	Ross Turville, General Manager
Next review date	14/10/2027
Status	Approved – issued
Revision history	V1 2026 – original issue (footer marked "V1 2026"; no issue date, author or review date recorded). Issue 1.1 – 14/10/2026: document control, approval signature and formatting update; content unchanged except where noted.

DT Compressor Services Ltd recognises its responsibility to minimise the environmental impact of its activities while delivering compressed air equipment distribution, installation, servicing, and maintenance services. Although the company does not manufacture products, it is committed to responsible environmental management in relation to its operations, supply chain, and service activities.

Our objective is to prevent pollution, reduce waste, use resources efficiently, and continually improve our environmental performance in line with applicable legislation and recognised best practice.

DT Compressor Services Ltd is committed to:

- Identifying, understanding, and complying with all applicable environmental legislation, regulations, and codes of practice relevant to our activities
- Identifying and reviewing the environmental aspects and impacts associated with our operations, services, and use of resources
- Managing waste responsibly, including the segregation, recycling, and appropriate disposal of waste materials
- Promoting the efficient use of natural resources and supporting sustainable practices where reasonably practicable
- Monitoring and managing energy consumption to reduce environmental impact and improve efficiency
- Preventing pollution and minimising environmental risks arising from our activities
- Managing environmental non-conformances and complaints through investigation and corrective action
- Monitoring environmental performance and implementing actions for continual improvement
- Maintaining appropriate environmental records to demonstrate compliance and performance

Senior management is responsible for providing the resources and support necessary to implement this policy effectively. This Environmental Policy is communicated to all employees, reviewed periodically, and made available to interested parties upon request.

Supporting Environmental Procedures

1. Environmental Legislation Identification and Review Procedure

Purpose: To ensure relevant environmental legislation and requirements are identified, understood, and complied with.

Procedure:

- Applicable environmental legislation and regulatory requirements are identified based on the company's activities
- Sources may include government guidance, regulator information, and customer requirements
- Legislative requirements are reviewed periodically and when significant changes to activities occur
- Compliance obligations are communicated to relevant personnel

2. Environmental Aspects and Impacts Identification Procedure

Purpose: To identify and assess environmental aspects and associated impacts arising from company activities.

Procedure:

- Environmental aspects associated with operations (e.g. waste generation, energy use, transport, use of consumables) are identified
- The potential environmental impacts of these aspects are assessed
- Significant aspects are reviewed periodically and when changes to activities occur
- Controls are implemented where necessary to reduce adverse impacts

3. Waste Management and Recycling Procedure

Purpose: To ensure waste is managed responsibly and in compliance with legal and environmental requirements.

Procedure:

- Waste is segregated where practicable to enable recycling
- Licensed waste carriers and authorised disposal or recycling facilities are used
- Waste transfer notes and related documentation are retained where required
- Opportunities to reduce waste generation are considered

Company waste carrier registration: Upper tier waste carrier, broker and dealer CBDU80038 (Environment Agency, 2025–2028). Environment Agency incident hotline (24 h): 0800 80 70 60.

4. Natural Resource Preservation and Sustainability Procedure

Purpose: To promote efficient use of natural resources and sustainable working practices.

Procedure:

- Consumption of materials such as paper, packaging, and consumables is minimised where practicable
- Reuse and recycling are encouraged
- Sustainable alternatives are considered where feasible
- Environmental considerations are taken into account when selecting suppliers and materials where appropriate

5. Energy Management Procedure

Purpose: To monitor and reduce energy consumption and associated environmental impact.

Procedure:

- Energy use related to premises, equipment, and vehicles is monitored where practicable
- Measures to reduce energy consumption are encouraged, such as efficient equipment use and switching off unused equipment
- Opportunities for energy efficiency improvements are reviewed periodically

6. Control of Environmental Non-Conformance and Complaints Procedure

Purpose: To ensure environmental incidents, non-conformances, and complaints are effectively managed.

Procedure:

- Environmental incidents, non-conformances, or complaints are recorded and investigated
- Appropriate corrective actions are implemented to prevent recurrence
- Relevant authorities and customers are informed where required
- Outcomes are reviewed to support continual improvement

7. Environmental Records Procedure

Purpose: To ensure environmental records are maintained as evidence of compliance and performance.

Procedure:

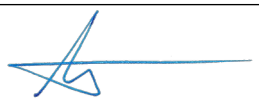

- Records may include waste transfer notes, legislation reviews, incident records, and monitoring data
- Records are legible, identifiable, and retrievable
- Records are retained for appropriate periods in line with legal and business requirements

8. Monitoring Environmental Performance Procedure

Purpose: To measure and review environmental performance and identify improvement opportunities.

Procedure:

- Key environmental indicators such as waste generation, recycling levels, and energy usage are reviewed where practicable
- Performance trends are considered during management reviews
- Actions are identified and implemented to improve environmental performance
